DETAILED ACTION

1. Applicant's amendment and remarks dated 8/22/05 has been received in application serial number 10/803,429. Claims 14-15 and 17 have been canceled.

Election/Restrictions

2. Newly submitted claim 18 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The prior claim 14 was a different species shape and dimension adhesive strip noting figures 6 and 7. The new claim 18 is directed to a different embodiment or species as noted in figures 12 and 13. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 16 (which depends from 18) and 18 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Scales 4,106,130. Scales discloses the structure as claimed noting figure 1 and 3 comprising: a non-rigid (plastic) contact member; a relatively narrow rigid pressure rib extending outwardly from the contact member; wherein the pressure rig is triangular (the base of 18 is wide and angles toward a point). The intended use recitation/functional language of the claims ex. "...conforming to the surface of a lower portion of a female breast, the contact member having a size and shape for being positioned between a nipple of the female breast and a bottom of the female breast..." carries no patentable weight in the absence of any distinguishing structure. Scales clearly discloses the structure as claimed and is found to be inherently capable of performing the functions.

Allowable Subject Matter

5. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 1-10 are allowed.

Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. It is noted that applicant should also consider the plastic protection on top of solid wind-up deodorants with a projecting fin which can read on the apparatus claim.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

9. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
